

Name: Lina Alrehaili

Online Test Application

I have used the current technologies:

Html, css, JavaScript, and JSON for the questions.

First, I organized the order as the question then the answers then the submit button, when its correct it shows a message that its correct and the opposite is vice-versa. After the user answers all 5 questions the results show and a button to take the quiz again. Below are screenshots of the quiz.

Name: Lina Alrehaili

Question 2 of 5

$9+6 = ?$

- ☐ 15
- ☐ 17
- ☒ 19

Go To The Next Question

Your answer is wrong!

You answered 2 out of 5 correctly!
